Audience Q&A Session

 Start presenting to display the audience questions on this slide.

Theme of the week

The societal impacts of technology

What is the relationship between **society
and **technology**?**

First off.. Why is this relevant?

JASON FRIED

April 26, 2021

Changes at Basecamp

At Basecamp, we treat our **company as a product**. It's not a rigid thing that exists, it's a flexible, malleable idea that evolves. We aren't stuck with what we have, we can create what we want. Just as we improve products through iteration, we iterate on our company too.

Recently, we've made some internal company changes, which, taken in total, collectively feel like a full version change. It deserves an announcement.

<https://world.hey.com/jason/changes-at-basecamp-7f32afc5>

1. No more societal and political discussions on our company Basecamp account. Today's social and political waters are especially choppy. Sensitivities are at 11, and every discussion remotely related to politics, advocacy, or society at large quickly spins away from pleasant. You shouldn't have to wonder if staying out of it means you're complicit, or wading into it means you're a target. These are difficult enough waters to navigate in life, but significantly more so at work. It's become too much. **It's a major distraction.** It saps our energy, and redirects our dialog towards dark places. It's not healthy, it hasn't served us well. And we're done with it on our company Basecamp account where the work happens. People can take the conversations with willing co-workers to Signal, Whatsapp, or even a personal Basecamp account, but it can't happen where the work happens anymore. *Update: [David has shared some more details](#) and more of the internal announcement on his HEY World blog.*

6. No forgetting what we do here. We make project management, team communication, and email software. **We are not a social impact company.** Our impact is contained to what we do and how we do it. We write business books, blog a ton, speak regularly, we open source software, we give back an inordinate amount to our industry given our size. And we're damn proud of it. Our work, plus that kind of giving, should occupy our full attention. **We don't have to solve deep social problems,** chime in publicly whenever the world requests our opinion on the major issues of the day, or get behind one movement or another with time or treasure. These are all important topics, but they're not our topics at work — they're not what we collectively do here. Employees are free to take up whatever cause they want, support whatever movements they'd like, and speak out on whatever horrible injustices are being perpetrated on this group or that (and, unfortunately, there are far too many to choose from). But that's their business, not ours. We're in the business of making software, and a few tangential things that touch that edge. **We're responsible for ourselves.** That's more than enough for us.

I bought a sauna

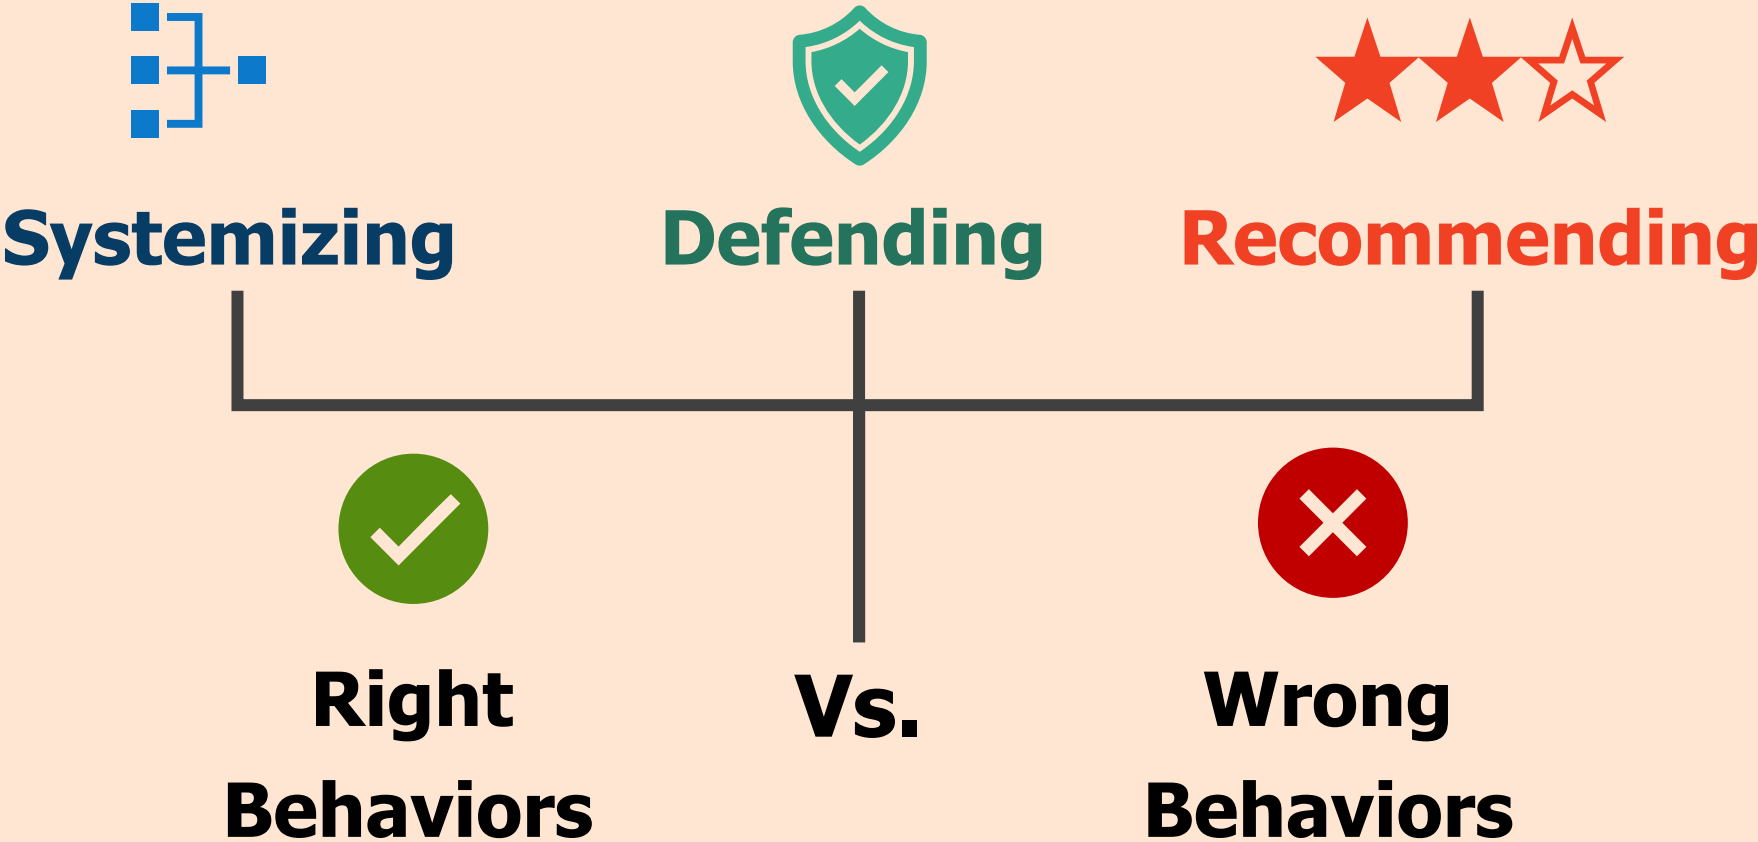

I bought a sauna. Which one doesn't matter. I barely know. I don't even care. Model number? I couldn't tell you. Maker? I'd pronounce it wrong. I just know it goes up to about 184 degrees Fahrenheit. I bought a sauna on a second-hand recommendation from someone I don't know, but do respect. I bought a sauna sight unseen, heat unfelt. I...

Analyzing this looks like a job for...

Ethnic

Reminder, ethics is about:

Reminder, ethics is about:

Understanding why we should be doing a certain action.

There are no “right” answers...

BUT!!!!!!

We should be able to **systemize, **defend**, and **recommend** what is **right** or **wrong** for ourselves.**

Three ethical terms to walk away with:

 **Technological Determinism**

 **Techno-facism**

 **Holism**

Society, Ethics, and Technology

Why?

“We live in a society”

slido

What do you think is the relationship between technology and society?

 Start presenting to display the poll results on this slide.

As a society where we are at:

**Social
Change**

**Technological
Change**

Where we need to be:

Why?

We have tools to solve social issues like:

- **Hunger**
- **Climate change**
- **Police brutality**
- **Houselessness**

But....

**We spend resources on trying to find “new”
bigger and better technical solutions instead of
addressing **root causes**.**

Why?

It's easier to invest in new technology than to face the causes of social problems.

Today's main point:

You cannot solve **social problems with just
technology.**

Don't be this type of mapper:

What do you call the idea reducing something into simpler components?

Reductionism

Reductionism

**In the social sciences:
Reduces qualitative data into
quantitative.**

- For example... this map can be reduced to:
 - Places where I lived ->
 - 4 points in Asia
 - 2 points in North America

Reducing my experiences to numbers on a continent.

Introduces loss of information.

Determinism

All our actions are pre-determined because it is governed by systems

Free-Will

Systems are chaotic so there is no predetermined events can be attributed to them

Compatibilists:

Determinism and free-will can co-exist.

Technological Determinism

The idea that technology will solve all social problems.

Example: We can “invent” our way out of climate change.

Technological Determinism

Technological Determinism

Technology

Society

Technology is the force that changes **society**

Technological Determinism

Technology

Society

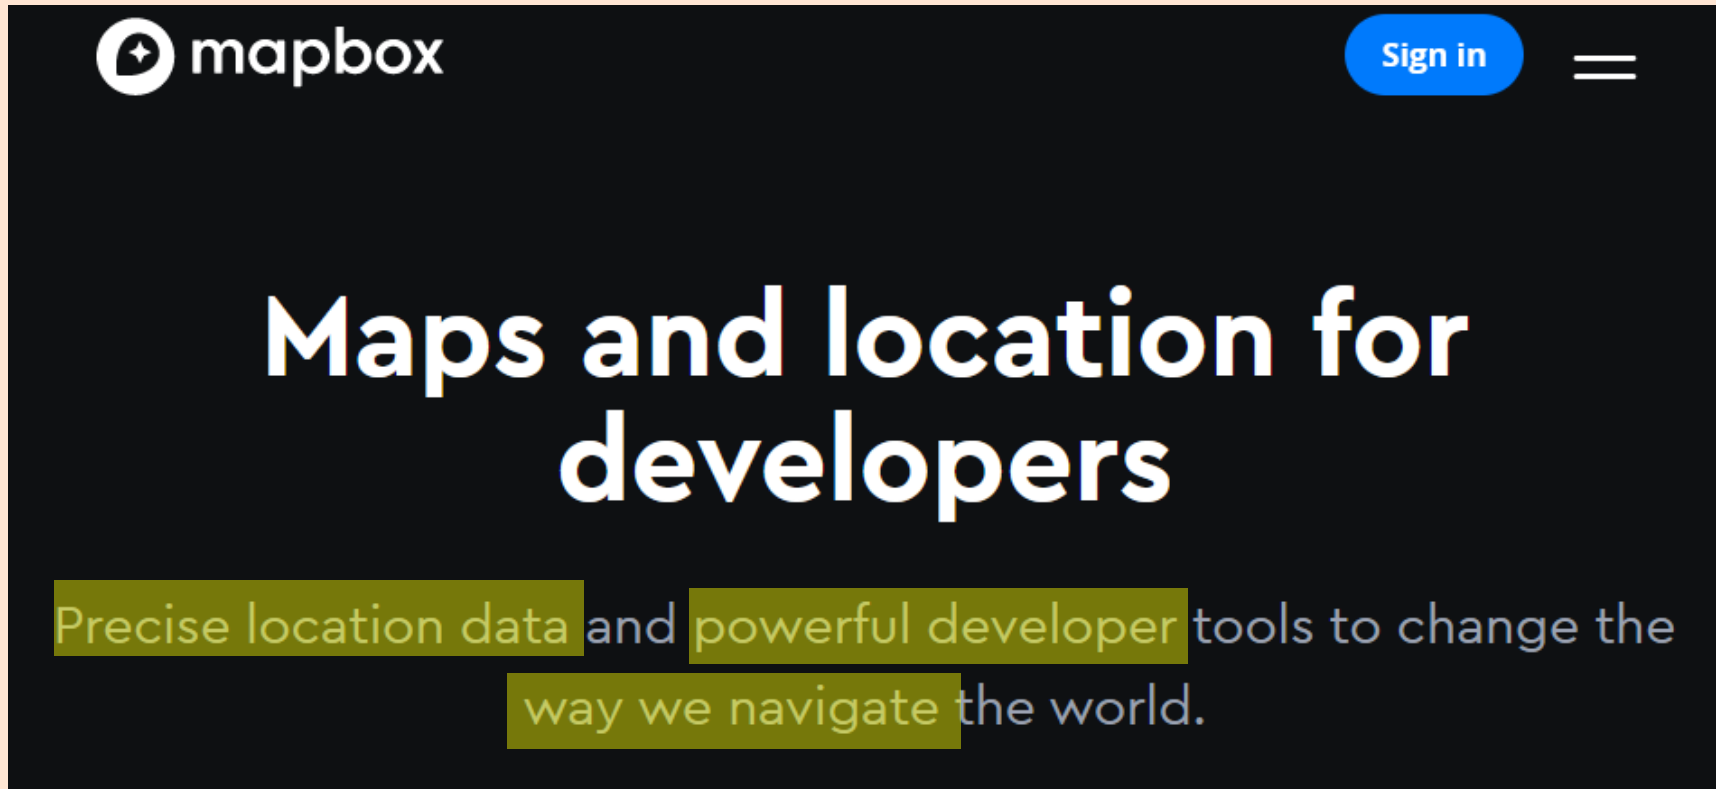

“Phones will improve people’s life.”

Let's apply this to mapping:

Mapping Technologies

The image shows a screenshot of the Mapbox website. At the top left is the Mapbox logo, which consists of a white circle containing a stylized location pin icon, followed by the word "mapbox" in a lowercase, sans-serif font. To the right of the logo is a blue rounded rectangular button with the text "Sign in" in white. Further right is a white hamburger menu icon (three horizontal lines). The main content area has a dark background. In the center, the text "Maps and location for developers" is written in a large, bold, white sans-serif font. Below this, a line of text reads "Precise location data and powerful developer tools to change the way we navigate the world." The words "Precise location data", "powerful developer", and "way we navigate" are highlighted with a light green background.

mapbox [Sign in](#)

Maps and location for developers

Precise location data and powerful developer tools to change the way we navigate the world.

Mapping Technologies

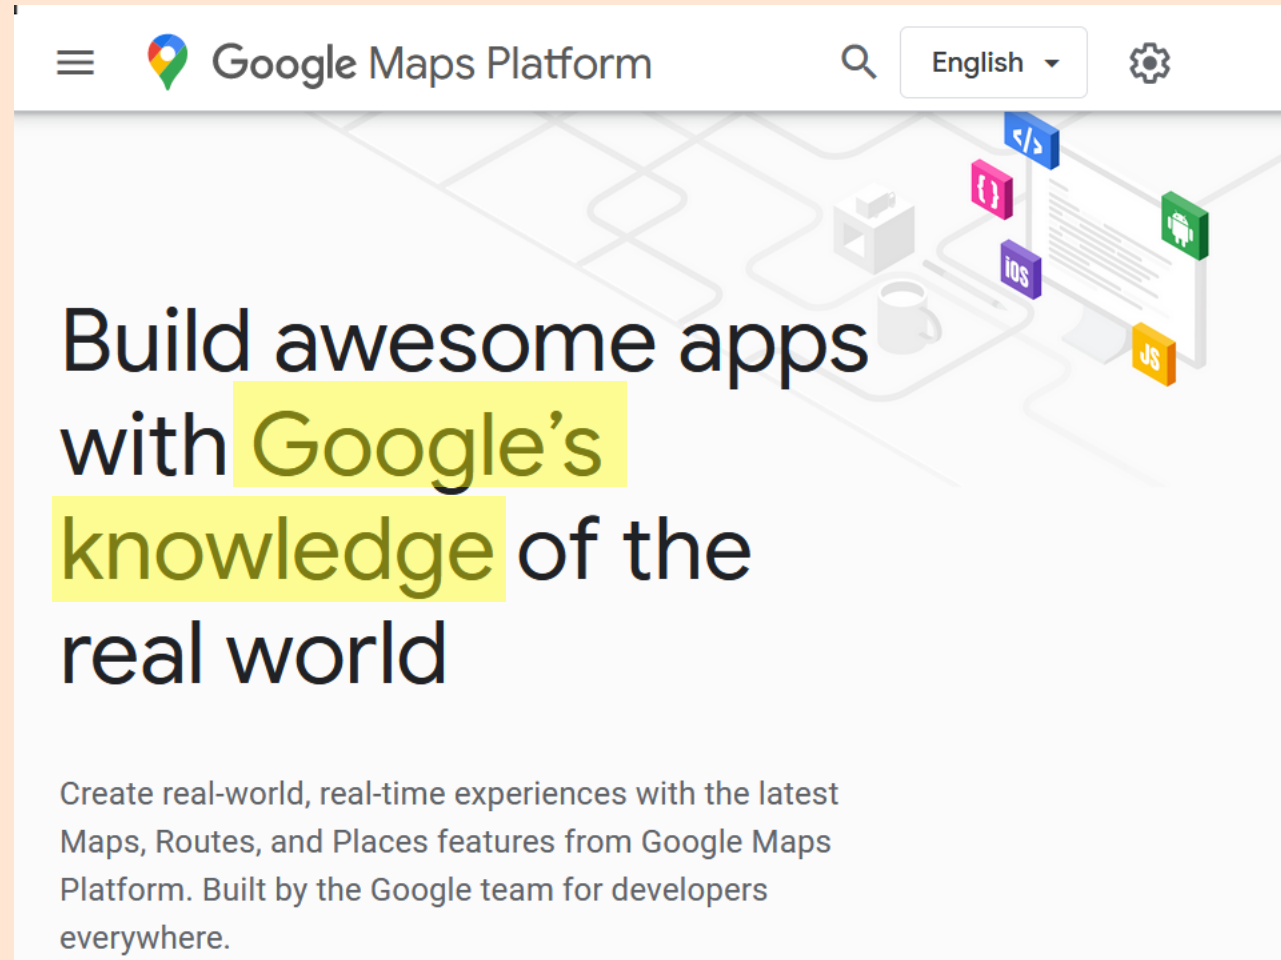

A red rectangular banner for Carto. In the top left corner is the Carto logo, which consists of the word "CARTO" in white uppercase letters followed by a white circle. In the top right corner is a white hamburger menu icon. The main text is centered and reads "Unlock the power of spatial analysis", with the word "power" highlighted in a yellow box. Below this, in smaller white text, is the tagline "The only cloud-native Location Intelligence platform".

CARTO

Unlock the **power** of
spatial analysis

The only cloud-native Location Intelligence platform

Mapping Technologies

The image is a screenshot of the Google Maps Platform website. At the top, there is a navigation bar with a hamburger menu icon, the Google Maps logo, the text "Google Maps Platform", a search icon, a language dropdown menu set to "English", and a settings gear icon. Below the navigation bar, the main content area features a large, stylized graphic of a map with various icons representing different technologies and platforms, including a code editor icon, a mobile phone icon, an iOS icon, a JavaScript icon, and an Android icon. The main headline reads "Build awesome apps with Google's knowledge of the real world", with "Google's" and "knowledge" highlighted in yellow. Below the headline, there is a paragraph of text: "Create real-world, real-time experiences with the latest Maps, Routes, and Places features from Google Maps Platform. Built by the Google team for developers everywhere." The background of the main content area is a light gray with a subtle grid pattern.

Mapping Technologies

Why are these examples problematic?

Separates society's role in creating the technologies.

Social Determinism

Social Determinism

Technology

Society

Technology is a result of the **society**

Social Determinism

Technology

Society

“People created phones to talk easier.”

Examples

an **open-source** JavaScript library
for **mobile-friendly** **interactive maps**

Examples

Recapping

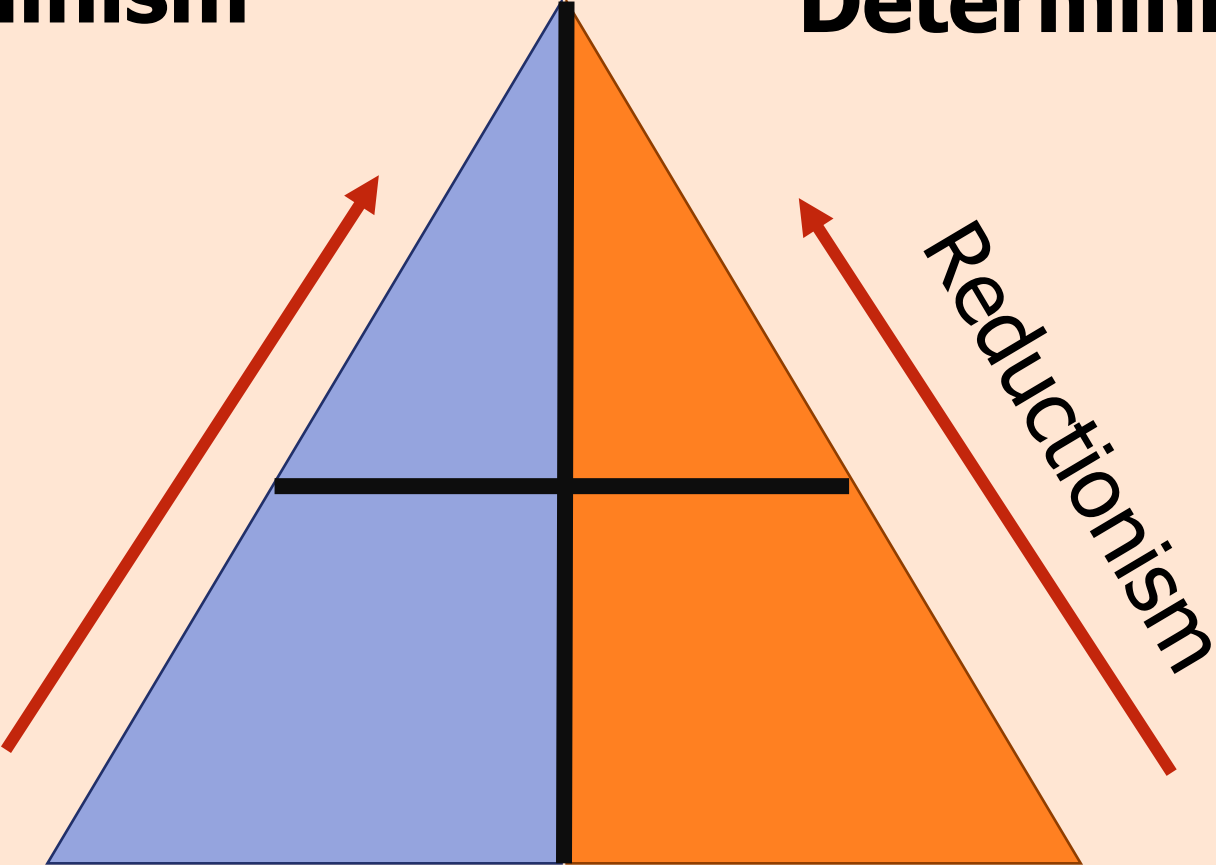

**Technological
Determinism**

Vs.

**Social
Determinism**

Hard

Soft

Main takeaway:

Reductionism is problematic because it only re-aligns the balance in one direction.

**Wait.. This is a technology skills class..
Shouldn't we focus on technology solutions?**

No, because.. It leads to...

Techno-Fascism

DJ
Fascism

Technocracy/Techno-Fascism

Fascism – Oppression of opposing thoughts

Technocracy – Rule by only those with expertise

Techno-Fascism = Fascism + Technocracy

Technocracy/Techno-Fascism

Techno-Fascism – Rule by those with expertise that oppresses opposing thoughts

Techno-Fascism:

**“Big tech, machine learning, AI is too big,
people cannot stand up against it.”**

Techno-Fascism:

Hasta la vista freedom

What it really means is:

“I have more ‘technical’ skills and know more than you, so I am better than you, do not resist.”

-Every Big Tech CEO

Resistance is futile.

How to avoid all this?

Holism

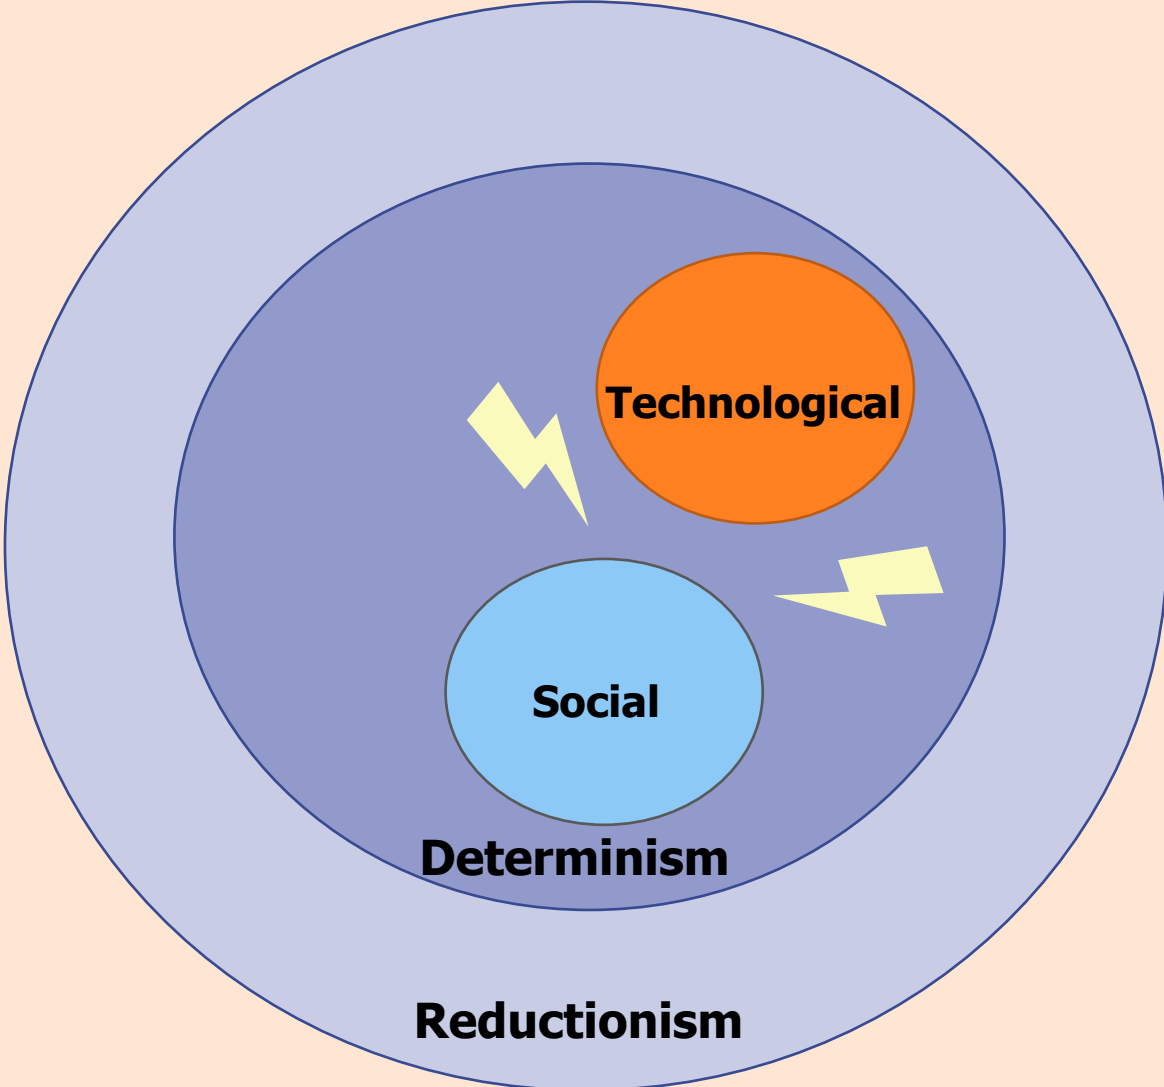

“Some process or phenomenon cannot be broken into parts, and can only be understood as a whole”

<https://cseweb.ucsd.edu/~goguen/courses/275f00/s2.html>

**Reinforces the direct connection between of
technology and society.**

Reductionism vs Holism

Eastern perspectives

Buddhism and Hinduism believe in a middle path to describing our decision-making by connecting it to consequence of our actions.

Reductionism vs Holism

Reductionism

esri Charging Up: Lifecycle of a Battery Raw Materials Cobalt A Story Map

Huayou then sells the cobalt to cathode manufacturers. Some of the largest cathode producing companies include Toda Hunan Shanshan, Pulead Technology Industry, Tianjin Bamo Science and Technology, and L&F Material.

Cobalt is processed by CDM

Pulead Technology Industry Co., Ltd.

Tianjin Bamo Science and Technology Co., Ltd.

L&F Material Co., Ltd.

Toda Hunan Shanshan New Material Co., Ltd.

Holism

Considering all we just covered...

**How to apply it to mapping, beyond just
Critical Cartography?**

Focus on Tradition-based GIS

Tradition	Key Ideas	Example Publications
Queer(ing) Cartographies, GIS	<ul style="list-style-type: none"> • Recognize queer labor and lives present in production of knowledge/maps <hr/> • Interrogate political, economic, and social relations present in software, algorithms, code used to produce maps 	Brown & Knopp (2008); Giesecking (2018)
Marxist Cartography	<ul style="list-style-type: none"> • Visualize and map the contours of capital and state power <hr/> • Interrogate how mapping serves interests of the state 	Lacoste (1973); Toscano & Kindle (2015)
Indigenous Mapping	<ul style="list-style-type: none"> • Make claims upon ancestral lands to secure tenure and other rights <hr/> • Simultaneously, potentially make said lands visible for looting and destruction 	Chapin et al. (2005); Hunt (2013); see Figure 3

<https://gistbok.ucgis.org/bok-topics/cartography-and-power>

Finally

**Consider what are your ethical views when it comes to society and technology?
How does it empower civil society?**

Thinking Cap for the week:

**Consider what are your ethical views when it comes to society and technology?
How does it empower civil society?**

Assignments

Due Thursday 4/29:

1. Group Assignment #3

Due Tuesday 5/4:

1. Readings
2. Thinking Cap #5
3. Extra Reading
