Hey I think there may be a problem with your basemap, I know some of them won't work without API keys. The code that you copy and paste should say if it needs a basemap or not if that's the issue. Also--cute dog!

Vanessa, I love the concept of your site and, of course, the pun!!! It's so cute!!!

I noticed that the circle markers aren't different colors like you intended them to be. (I may have been struggling a lot with this and looked at the code in every previous submission to try to figure out what I was doing wrong...)

You would need to add circleOptions into addLayer, like

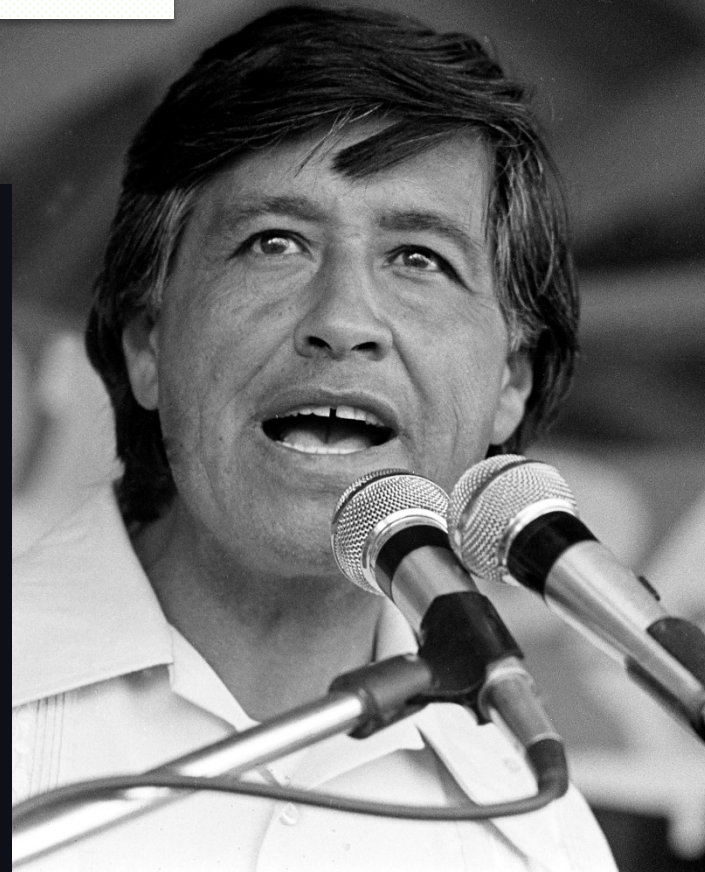

```
L.circleMarker([data.lat,data.lng], circleOptions)
```

Also, you're missing the hashtag symbol for one of the hex codes (800000)

CESAR CHAFESTIVE THINKING CAP

Lauren Valles

Ivalles10 6 days ago

I seek to be a peer/mentor for civil society by not only helping empower folks to achieve their goals, but also aspire to hold people I chat about professional development with to truly helping civil society if they've expressed that that's a priority for them in their life. For example, a lot of my friends want to dismantle the nature of oppressive closed source tools, but end up working for big companies in order to make a livable wage. So, I think my role in addition to supporting my friends in the pursuit of their dreams is also holding them accountable to their values.

The act of stating my problem definitely brought out insights about way the I think so frequently in extremes! My partner reminded me that I don't always have to think in a binary form- I can still be involved in communities without taking on an all-consuming leadership role. I hadn't considered the way I was functioning in an all-or-nothing thinking model, which is what my partner helped me be more conscious of.

I like asking questions, so it wasn't difficult to avoid giving advice!

I also just saw the sentence designation; apologies that this went over LOL.

CAN'T GET GRACE LEE BOGGSED DOWN ON THIS POST!

Rachel Chan

rachan2023 6 days ago

I hope to be a peer or a mentor for civil society by talking to my community and listening to their concerns first (instead of providing advice right away) in order to try to empathize with them and let them know that I am hear their voices. The simple act of stating my problem brought a lot of insights! I explained to my partner that I wasn't sure how to implement parts of my project and he asked questions about my current approach and things that I would do differently, so that I can come up with different and new ideas myself. When I was the mentor, it was really difficult preventing myself from giving advice because I want to help them with their problem, but I think listening to their line of thinking is most important.

Verbalizing my problem allowed me to contextualize the issue I've been running into, the act of which helped me to see my problem more holistically. My partner asked very thought-provoking questions which made me think more extensively about different aspects of my survey I hadn't considered in relation to my problem. It was difficult not to frame my feedback as advice at some points, however, asking questions helped me to understand the problems at hand from a different perspective! I seek to be a peer/mentor for civil society by keeping ethics in mind and remembering to encourage/practice accessibility and accountability.
